

**Dear Parent**

The punch of uniqueness and the ability of stand out from the crowd can guarantee success in the era of stiff competition. Every child must plan to do something different and work on it effectively. Nowadays, competition is getting tougher day by day and to prepare students for the challenging path, we are taking initiatives at a very early age. Early exposure to learning and competition builds confidence and sharpens skills which raise their level from other students on the same platform.

Students, irrespective of their career interest, should start appearing in various national and international-level competitive exams.

Competitive exams also help out in choosing a career as students start identifying their areas of interest while getting a deeper knowledge of subjects. The purpose of competitive exams is not only to judge your talent but also to test your management and planning skills. The whole concept of any competitive exam is based on strategic thinking and smart work.

The school recommends various exams conducted by different government or private bodies of repute for students from class 1 onwards.

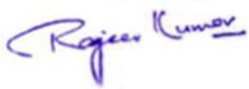

**The list of these External Exams / Competitions being recommended by the school is as follows:**
